

## WCSD WEEKLY REPORT – Week of April 27-May 3, 2017

**WCSD Helps Update epa.gov to Reflect the Priorities of the New Administration** - On Friday April 28, members of the Web Content Services Division carried out the directions of Office of Public Affairs to redirect some EPA public websites to new locations. Working with contractor staff, OEI redirected [www.epa.gov/climatechange](http://www.epa.gov/climatechange) to a static page explaining “We are currently updating our website to reflect EPA's priorities under the leadership of President Trump and Administrator Pruitt. “ WCSD staff took other steps to clear the Climate Change website content quickly from the Akamai content delivery network so that OPA could issue their News Release referencing the new information. In addition, WCSD staff redirected the Clean Power Plan and Clean Power Plan Toolbox to the new Energy Independence site. WCSD staff also directed the EPA search team to remove some of affected URLs from EPA search results and fixed some issues with other redirects on [www3.epa.gov](http://www3.epa.gov). **SharePoint Organization Site Request Workflow** - The process through which people request SharePoint sites has been updated. While work and community sites need only go to the Office/Region Site Collection Administrator (SCA) for approval and deployment, organization site requests need to go through a sponsor's approval as well. This sponsor is often a manager -- someone who needs to know about organization-specific sites. The workflow for the organization site request goes to the sponsor before it goes to the SCA for final approval and deployment. (Sally Martiny, 202/564-6067)
